

Bare Brews Deboozyfying Technology

Bare Brews introduces a groundbreaking mobile alcohol separation system designed to efficiently remove alcohol from beer, wine, or spirits, while also generating a crystal-clear alcohol water byproduct. Our system boasts a daily production capacity of 20 to 80 BBL and features proprietary automation for continuous monitoring and measurement of incoming and outgoing liquid flow rates. This advanced technology separates alcohol and water seamlessly, and is AI-compatible to ensure optimal extraction and product consistency.

The Result

It allows you to produce and sell your favorite beverages with less than 0.5% ABV – hangovers not included!

Produce a sellable byproduct of alcohol water, perfect for crafting exceptional seltzers, which alone will more than cover the cost of our services. It's like the frothy head on a perfect pint – it adds value and covers the tab!

Components of Our Dealcoholizing System

Operates within your own facility with zero capital expenditure, enabling quick market entry with proven technology. Join the fastest-growing segment of the craft industry with Bare Brews. Contact us today to learn more!

Features:

In-Line Alcohol Separation System:

Operable via mobile unit or within your facility using our rolling skid systems.

Sanitary Stainless-Steel Butterfly Valve(s)

High-Pressure Booster Pump:
Ensures consistent product flow.

IFM Instrumentation Components:

Monitors product flow, temperature, and pressure.

Tubular 304 Stainless Steel Base with Food-Grade Casters

PLC Controls and Human-Machine Interface: Includes AI-compatible documentation.

Sanitary PD Pump

Secondary Post-Filtration

Technical Data

Hard Seltzer (Permeate) Production:
20, 40, or 80 BBL per 8-hour day.

Product Supply:
28, 56, or 112 gpm @ 15 psi (+/- 5 psi).

Low/Non-Alcohol Return (Retentate):
25, 50, or 100 gpm.

Utility Requirements

Power:
208VAC, 3 Phase, 60 Hertz, 60 Amps.

Female Plug End Required

LEV Series IEC Pin & Sleeve Connector
(Part #460C9WLEV)

60 Amp, 250 Volt 3-Phase, 3P, 4W, LEV Series
North American-rated IEC 60309-1 & 60309-2
Pin & Sleeve Connector, Industrial Grade,
IP66/IP67/IP68/IP69K, Watertight - Blue

With Bare Brews, tap into the latest in dealcoholizing technology and ride the wave of the craft beverage revolution. Don't miss out—give us a call today and let's brew up something amazing!
