

Bare Brews Mobile Dealcoholization System

The non-alcoholic (NA) beer market is bubbling up as the fastest-growing segment in the beer industry, with sales expected to hit a whopping \$40 billion by 2032. Until now, the craft brews have been left out of the party due to the hefty equipment costs and expertise required. But that's all Changing!

Bare Brews is thrilled to introduce Mobile Non-Alcoholic Beer and Pasteurizing Services, performed right in your facility. This groundbreaking service enables micro and craft breweries, wineries, and spirit manufacturers to enter the non-alcoholic market. Our process not only removes alcohol from beverages and enhances safety and shelf life by eliminating harmful microorganisms, but also produces alcohol water, which can be transformed into exceptional seltzers that will cover the cost of the service.

This innovation represents a major milestone in our commitment to providing cutting-edge mobile technology for companies looking to produce their own non-alcoholic beverages on-site. Bare Brews' state-of-the-art mobile dealcoholizing and pasteurization process revolutionizes the market, allowing smaller and medium-sized manufacturers to join without the burden of substantial equipment costs.

As a global leader in mobile extraction, separation, equipment, and innovative solutions, Bare Brews now offers its proprietary dealcoholization and pasteurization processes and equipment to

companies across North America. With facilities in Canada and North Carolina, Bare Brews specializes in providing beverage development and production solutions for low-and-no alcohol wines, beers, spirits, and ciders. Our comprehensive services include product formulation, supply chain management, exclusive access to advanced mobile equipment.

Supported by a dedicated team of designers, fabricators, engineers, winemakers, and scientists, Bare Brews serves as a one-stop shop for beverage brands of all sizes aiming to produce the highest quality low and non-alcoholic beverages.
